

Planting Seedlings

Seedlings are small plants. They can be purchased from a nursery or you can start your own. Make sure to harden them off, which means gradually get them used to the sunlight outside. If you buy seedlings, ask if they have been hardened off.

Watch a video at bit.ly/34yE3Du or scan the QR code to learn about how to harden off seedlings.

Once your seedlings have been hardened off, they are ready to be planted in your container or raised bed. See page 13 to make sure that you have the right size container for your plant.

Watch the videos below to learn more about planting seedlings. You can also read the instructions on the next page.
